C01

They measured activity instead of whether the service worked.

C02

There was no-one who could say 'stop'.

C03

They removed people before proving that the work had disappeared.

C04

The easy work disappeared. The difficult work stayed.

C05

The system optimised the wrong objective.

C06

The savings were worth the occasional expensive mistake.

C07

The real world was different from the test.

C08

The people checking it trusted it too much.

C09

The information it needed was missing or out of date.

50 mm: measure before cutting

X07

The AI was trying to impress another AI.

X08

The AI was too proud to ask for directions.

X09

The AI gave itself a glowing performance review.

X10

The AI thought 'close enough' was a unit of measurement.

X11

The AI was trying to finish before the long weekend.

X12

The AI put the humans on mute.

X13

The AI filed every exception under 'someone else's problem'.

X14

The AI thought the checkbox was the hard part.

X15

The AI thought 'just this once' was a renewable resource.
